1. On instructions from the Russians, launching platforms for guided missiles of the V-1 and V-2 types are being erected at the Orkeny (N78) training grounds and in restricted areas in the Bakony Forest, the Vertes Mountains, and the Bukk Mountains. Outer casings for the V-2 weapons are allegedly being manufactured at the Rakosi Works on Csepel Island.
2. Bomber pilots are being trained at the Matyasföld airfield. Extensive barracks have been built along the road to Sashalom (H52).
3. The Budaörs airfield, which has hitherto been used mainly for commercial purposes, is now in military use. At the field there is a secret depot (contents unknown), which is closed to all civilians, including truck drivers delivering shipments for the state transportation company.
4. A new arms or munitions factory is being built approximately ten kilometers north of Budaörs. Workers have been drawn from near-by internment camps; there are also 100 or more specialists. The total number of workers is to be 2,000 by the end of 1951.
